## QUARTERLY ACTIVITIES REPORT SEPTEMBER 2022

---

Discovery Alaska Limited (ASX: DAF) ("the Company") is an Australian based mineral exploration company with a 100% interest in the Chulitna Project in Alaska, USA.

The Company provides the following update for the Quarter;

### **Exploration Activities**

#### ***Chulitna Project (Alaska) (100% interest)***

The Company continued works to progress activities at the Chulitna Project in Alaska, including:

- Receipt of assay results from historic drill core sampling at the Coal Creek prospect, outlining
  - Broad zones of lithium mineralisation confirmed;
  - Lithium mineralisation open at depth and along strike;
  - Multi-commodity potential at Coal Creek with lithium, tin, tungsten, tantalum, silver, niobium, and other specialty metals;
  - Accessibility, quality and quantity of Coal Creek historic drill core allows DAF to advance further exploration works, with the aim to establish a JORC lithium resource.
  
- The Chulitna Project contains multiple prospect targets for varying commodities, including lithium, gold, silver, tin, copper & base metals.

The Chulitna Project comprises 308 State mining claims covering 199.4km<sup>2</sup>, is located on State of Alaska public lands, and is not subject to any Native Title claims, native lands, or native claimant groups. The project lies approximately 250km north of Anchorage and close to the major Parks Highway, which runs mostly parallel to the State-owned Alaska railroad.

#### **Coal Creek Lithium Prospect**

The Company identified lithium at the Coal Creek prospect and conducted a comprehensive work program to qualify and quantify the lithium (and other critical minerals) occurrences at Coal Creek, with current analysis works confirming lithium mineralisation from historic drill core at the Coal Creek prospect.

The detailed work program of selected priority historic drill core comprised core logging, core cutting, core photography, core sampling and laboratory analysis works.

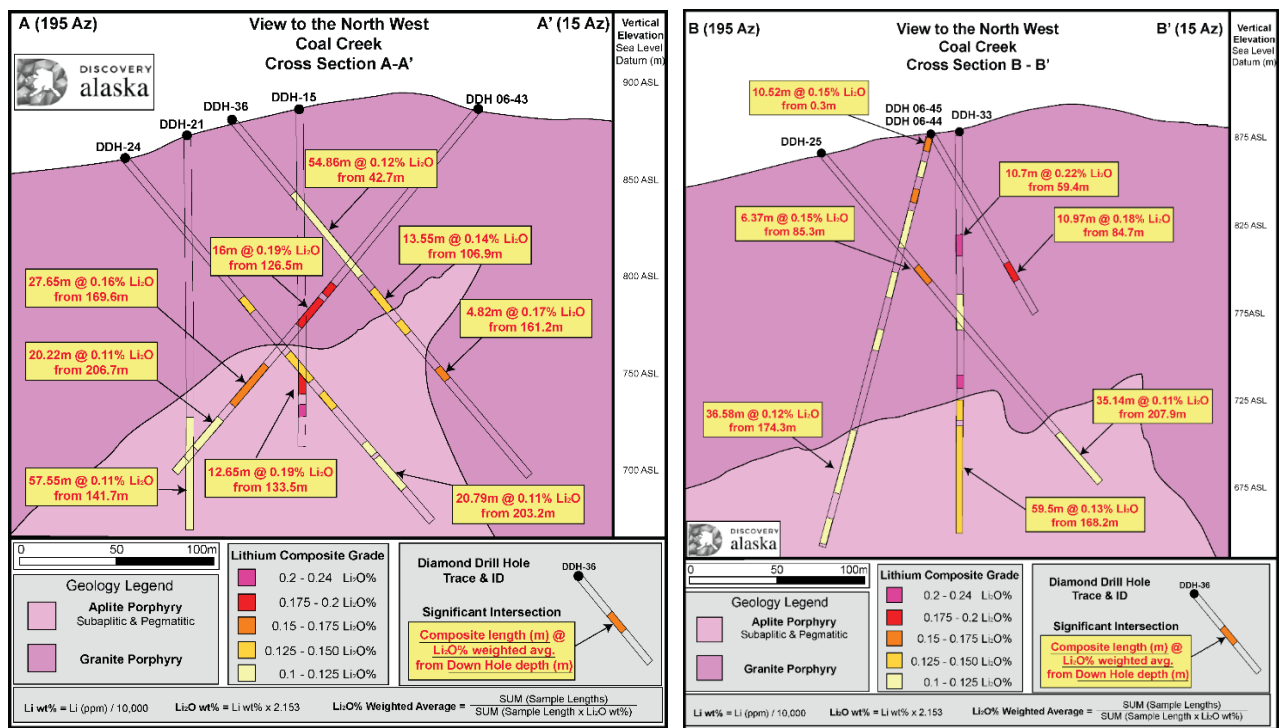

# DISCOVERY alaska

The distribution of laboratory analysis results indicates significant broad intercepts of lithium-rich zinnwaldite mineralised zones concentrated within the deeper aplitic granite porphyry and separate higher-grade lithium zones potentially localized along structurally controlled zones of east-west striking, near-vertical sheeted greisen veining (see Figures 1 & 2).

The priority drill holes selected for laboratory analysis works – DDH-15, DDH-21, DDH-24, DDH-25, DDH-33, DDH-36, and DDH06-43, DDH06-44, DDH06-45 and DDH06-46 – historically targeted intrusion-hosted, sheeted greisen veins containing tin-silver-zinc mineralization, and were selected for re-sampling due to:

- their distribution within the primary area of the tin-silver-zinc resource; and
- documentation of the presence of high-iron bearing white mica, or zinnwaldite – a common lithium-bearing mica, occurring within greisen alteration and veining.

Figures 1-2. Coal Creek Cross Section A-A' & B-B' showing lithium intervals

Significant lithium results from the laboratory analysis works, includes;

- 16m @ 0.19% Li<sub>2</sub>O from 126.5m in hole DDH06-43
- 10.97m @ 0.18% Li<sub>2</sub>O from 84.7m in hole DDH06-44
- 27.65m @ 0.16% Li<sub>2</sub>O from 169.6m in hole DDH06-43
- 59.5m @ 0.13% Li<sub>2</sub>O from 168.2m in hole DDH-33
- 54.86m @ 0.12% Li<sub>2</sub>O from 42.7m in hole DDH-36

# DISCOVERY alaska

- 36.58m @ 0.12% Li<sub>2</sub>O from 174.3m in hole DDH06-45
- 57.55m @ 0.11% Li<sub>2</sub>O from 141.7m in hole DDH-21

The Company previously announced the Coal Creek prospect contains historical works, including a 2015 NI 43-101 Report (prepared for Strongbow Exploration Inc.) comprising a "Technical Report on the Coal Creek Tin-Silver Exploration Target". This report included selected historical drilling and associated assay data, and a conceptual exploration target estimate.

### Partin Creek Prospect

No exploration work was undertaken at Partin Creek prospect during the Quarter.

### New Project Opportunities

The Company will continue working to identify and review other new projects that may complement the Company's current activities.

## Competent Person's Statement

The information contained in this ASX release relating to Exploration Results has been prepared by Mr Jerko Zuvella. Mr Zuvella is a Member of the Australasian Institute of Mining and Metallurgy, and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Zuvella is a Director of Discovery Alaska Ltd and consents to the inclusion in this announcement of this information in the form and context in which it appears. The information in this announcement is an accurate representation of the available data from the Chulitna Project.

The 2021 and 2022 Chulitna Project exploration program includes a Quality Control/Quality Assurance (QA/QC) program overseen by Jesse C. Grady, MSc, CPG-11592. Mr Grady is a Qualified Person as defined by NI 43-101. Mr Grady has prepared and approved the technical information contained within this announcement.

**Forward Looking Statements:** Statements regarding plans with respect to the Company's mineral properties are forward looking statements. There can be no assurance that the Company's plans for development of its mineral properties will proceed as expected. There can be no assurance that the Company will be able to confirm the presence of mineral deposits, that any mineralisation will prove to be economic or that a mine will successfully be developed on any of the Company's mineral properties.
